SUMMARY

Software Engineering graduate from Telkom University Purwokerto with experience in full-stack web development, software development, and project management. Skilled in building responsive web applications, developing scalable software solutions, solving technical problems, and managing projects from planning to implementation. Proven leadership, communication, and teamwork abilities through academic projects, organizational activities, and professional experience.

WORK EXPERIENCE

Telkom University Purwokerto, *Undergraduate Thesis Researcher / Backend Developer* **12/2025 - 06/2026**

- Designed and developed backend services for a WebGIS application for agricultural monitoring using FastAPI and PostgreSQL.
- Developed RESTful APIs and backend services for weather and commodity price prediction using time-series forecasting.
- Managed data processing, database integration, system testing, and deployment to ensure reliable application performance.
- Planned and coordinated the development process from system analysis and implementation to testing and deployment.

Diskominfo Kota Tasikmalaya, *Full-Stack Developer* **07/2025 - 08/2025**

- Developed a company profile website for a regional government institution to provide accessible information about government devices, services, and organizational profiles.
- Designed and implemented responsive front-end interfaces and back-end functionality to support content management and website operations.
- Collaborated with stakeholders to gather requirements, translate organizational needs into technical solutions, and ensure the website aligned with institutional objectives.

Program Pembinaan Mahasiswa Wirausaha (P2MW), *Treasurer & Secretary* **02/2024 - 11/2024**

- Managed financial records, budgets, and transactions to support the effective execution of the entrepreneurial program.
- Handled administrative documentation, meeting records, and correspondence to ensure organized program operations.
- Contributed to business planning, mentoring sessions, and entrepreneurial activities while supporting the development and implementation of the team's business initiatives.

HMSE, *Member, Internal Advocacy Division* **07/2023 - 07/2024**

- Contributed to channeling and addressing the aspirations and concerns of Software Engineering students through the division's advocacy activities.
- Assisted in identifying, collecting, and mapping academic and facility-related issues raised by students.
- Participated in audiences, open discussion forums, and other advocacy initiatives to facilitate communication between students, lecturers, and the campus.
- Collaborated with team members in planning and executing advocacy programs and developing solutions to student concerns.

EDUCATION

Bachelor of Software Engineering, *Telkom University Purwokerto* **2022 - 2026**

- GPA: 3.66/4.00
- Activities: Web Developer; Member of the Student Empowerment Department, HMSE
- Final Thesis: Implementation of Prophet-Based Commodity Price and Weather Prediction Backend on WebGIS

QUALIFICATIONS

- **Languages:** JavaScript, TypeScript, Python, PHP, Java, Dart
- **Frameworks & Technologies:** React.js, Vite, FastAPI, Laravel, Node.js, Tailwind CSS.
- **Database & Tools:** PostgreSQL, PostGIS, MySQL, Git, GitHub, Postman, Figma, Notion, Visual Studio Code
- **Productivity:** Microsoft Word, Excel, PowerPoint
- **Core Competencies:** Full-Stack Development, Software Development, Project Management, Problem-Solving, Teamwork, Leadership, Communication, Critical Thinking, Adaptability
